

Kumiko Lamp Assemble Instructions!

Step 1 – Prepare Panels & Cylinder

Glue parchment paper to the back of each Kumiko panel to act as a light diffuser.

Next, glue the strip around the cylinder, keeping it straight and evenly wrapped.

Step 2 – Assemble the Frame

Glue the four legs to the bottom frame, making sure everything is square.

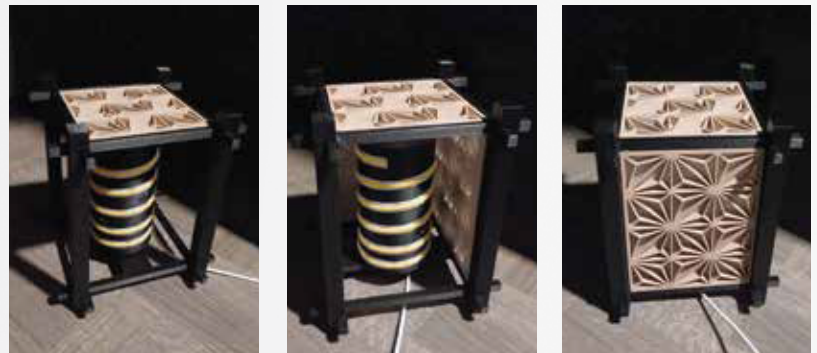

Once secure, place the cylinder into the center of the frame and legs.

Step 3 – Secure the Top & Panels

Glue the top frame onto the structure to lock the legs and cylinder in place.

Attach the Kumiko panels to the frame, starting with the top panel and

continuing around until all panels are installed.

Final Step – Enjoy your lamp!!

Connect the led strip power it on, and enjoy your finished Kumiko Lamp.
